DULNINDU SARANGA

Computer Science Undergraduate

About Me

Computer Science undergraduate with strong interest in software development, front-end design, and problem-solving. I enjoy building Python applications and responsive websites using HTML, CSS, and JavaScript. I'm also expanding my skills by learning Blender 3D modeling and basic UI/UX design.

Skills

- Programming Languages:
  Python, C, C++, HTML, CSS, JavaScript and Java
- Web Development:
  HTML5, CSS3, Responsive Design, JavaScript
- Software Engineering:
  OOP, Modular Design, Debugging, SDLC Documentation
- Database & File Handling:
  JSON, File I/O, Data Persistence
- Tools & Technologies:
  Tkinter, Flask (Basic), Git & GitHub, VS Code, PyCharm, Microsoft Word, Excel, PowerPoint
- Soft Skills:
  Leadership, Teamwork, , Problem-Solving, Time Management, Adaptability
- Languages:
  Sinhala, English

Education

University of Westminster, UK 2024 - Present

BSc (Hons) in Computer Science – Undergraduate

Ananda College, Colombo 10 2010 - 2023

G.C.E. O/Ls - 2021 (2020)

G.C.E. A/Ls - 2022 (2023)

Aquinas College of Higher Studies 2023 - Present

Diploma in English (Intermediate Level Completed)

Final level in progress, expected to finish in 2025

Informatics Institute of Technology (IIT)

2025(October)- 2026(March)

Professional Certificate in Cyber Security and Networking

Academic & Personal Projects

1. Task Manager (CLI → GUI Hybrid)

Tools: Python, Tkinter, JSON 2024(February) - 2025(April)

- Built a multi-stage task manager evolving from CLI to Tkinter GUI.
- Integrated JSON storage with task filtering, sorting, and editing.
- Documented system design, test cases, and user manual for usability.

2. HelaDry: Solar-Powered IoT Dehydrator

2025(October)-2026(March)

Tools: C/C++, Python, HTML/CSS, IoT, UML Modeling

- Developing a smart hybrid solar dehydration system to effectively reduce post-harvest crop loss.
- Programming IoT sensor hardware using C/C++ and building the project web interface using Python and HTML.
- Designing detailed system architecture diagrams (UML) and the Business Model Canvas to guide agile development.

3. Portfolio Website 2025(May)-Present

Tools: HTML, CSS, JavaScript

- Building a fully responsive personal portfolio website to showcase all my academic and software projects.
- Adding animated sections, smooth navigation, and modern UI components to improve user engagement.
- Expanding the site with new pages, updated project cards, and interactive elements as part of an ongoing redesign.
- Aiming to turn it into a complete online profile with project previews, downloadable CV, and contact features.

Teamwork & Leadership Evidence

- Demonstrated leadership as the Treasurer of the School ICT Society, managing responsibilities and supporting organizing activities.
- Gained strong teamwork experience through participation in school Volleyball and Athletics teams.
- Took initiative in coordinating tasks and contributing to team collaboration during university group projects.

Achievements

- School Volleyball Team (2018–2021)
- School Athletics Team (2015–2019)
- Treasurer, School ICT Society (2022)
- Completed multiple Python and web development projects
- Created structured documentation (pseudocode, test cases, user manuals)
- Self-learning Blender 3D modeling and UI/UX basics
- Built a responsive personal portfolio website
